

# Foundry Maple Tile, Patina or Bright: Batch #31058

Pullman Couch Company

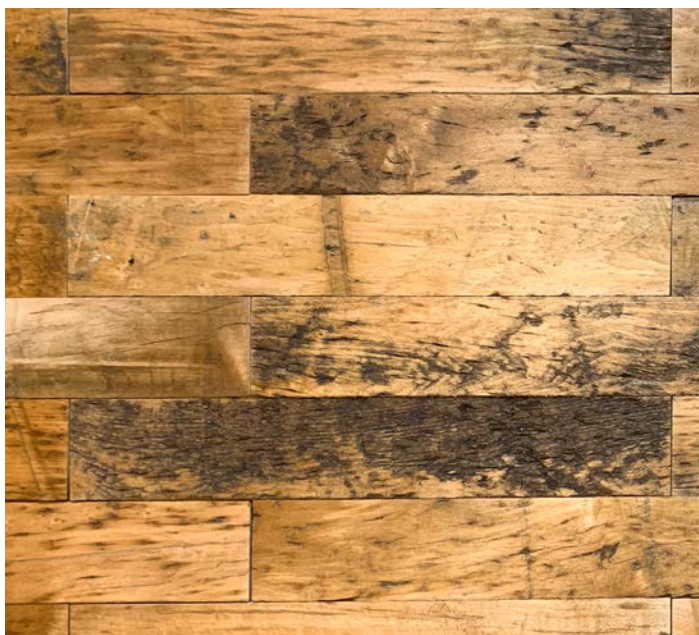

The flooring material used to make these tiles was originally salvaged from the Pullman Couch Company Warehouse in Chicago. These floorboards were re-milled into 3/16" thick, 2" wide strips, and then assembled into mesh-backed 12x12" offset tiles. These tiles come in two grades: our Patina has a rich brown surface with a variety of wear and scratch marks. Our Bright has been sanded clean to reveal the light Maple with hints of it's previous life. Both grades come pre-finished with a poly sealer.

## Source Location: Chicago, Illinois

Fire & Ice: Fate of an Iconic Chicago Warehouse. Built in 1911, the Pullman Couch Company warehouse was part of the world's first industrial park, the Central Manufacturing District (CMD); a 265-acre campus in the south of Chicago. The park eventually housed several big-name companies such as Spiegel, Goodyear, Starck Piano Co., the William Wrigley Co., and Westinghouse. In the winter of 2013, a fire swept through the property, destroying many of the vacant and historic buildings. Fortunately, a great deal of wood was salvaged from the structures including flooring, decking, and timbers.

Bright

## Foundry Maple Tile, Patina or Bright: Batch #31058 Pullman Couch Company—Chicago, Illinois

### Solid Dimensions:

- Thickness: 3/16"
- Width: Each tile is made up of six boards, each board measuring 2" wide
- Length: 12" offset
- Back: Strips mounted on mesh backing

### Installation:

- Wall only
- Glue recommended

### Surface:

- Sanded with a Poly Sealer applied

### Certifications:

- FSC Recycled 100% (SCS-COC-003998)
- LEED point eligible

**\$431.20 per box**

**\$26.95/sq ft**

- Sold per box
- Each box contains 16 tiles
- Each tile covers 1 square foot
