

Redwood Wine Vat Stock: Batch #12031

Shown in Smooth

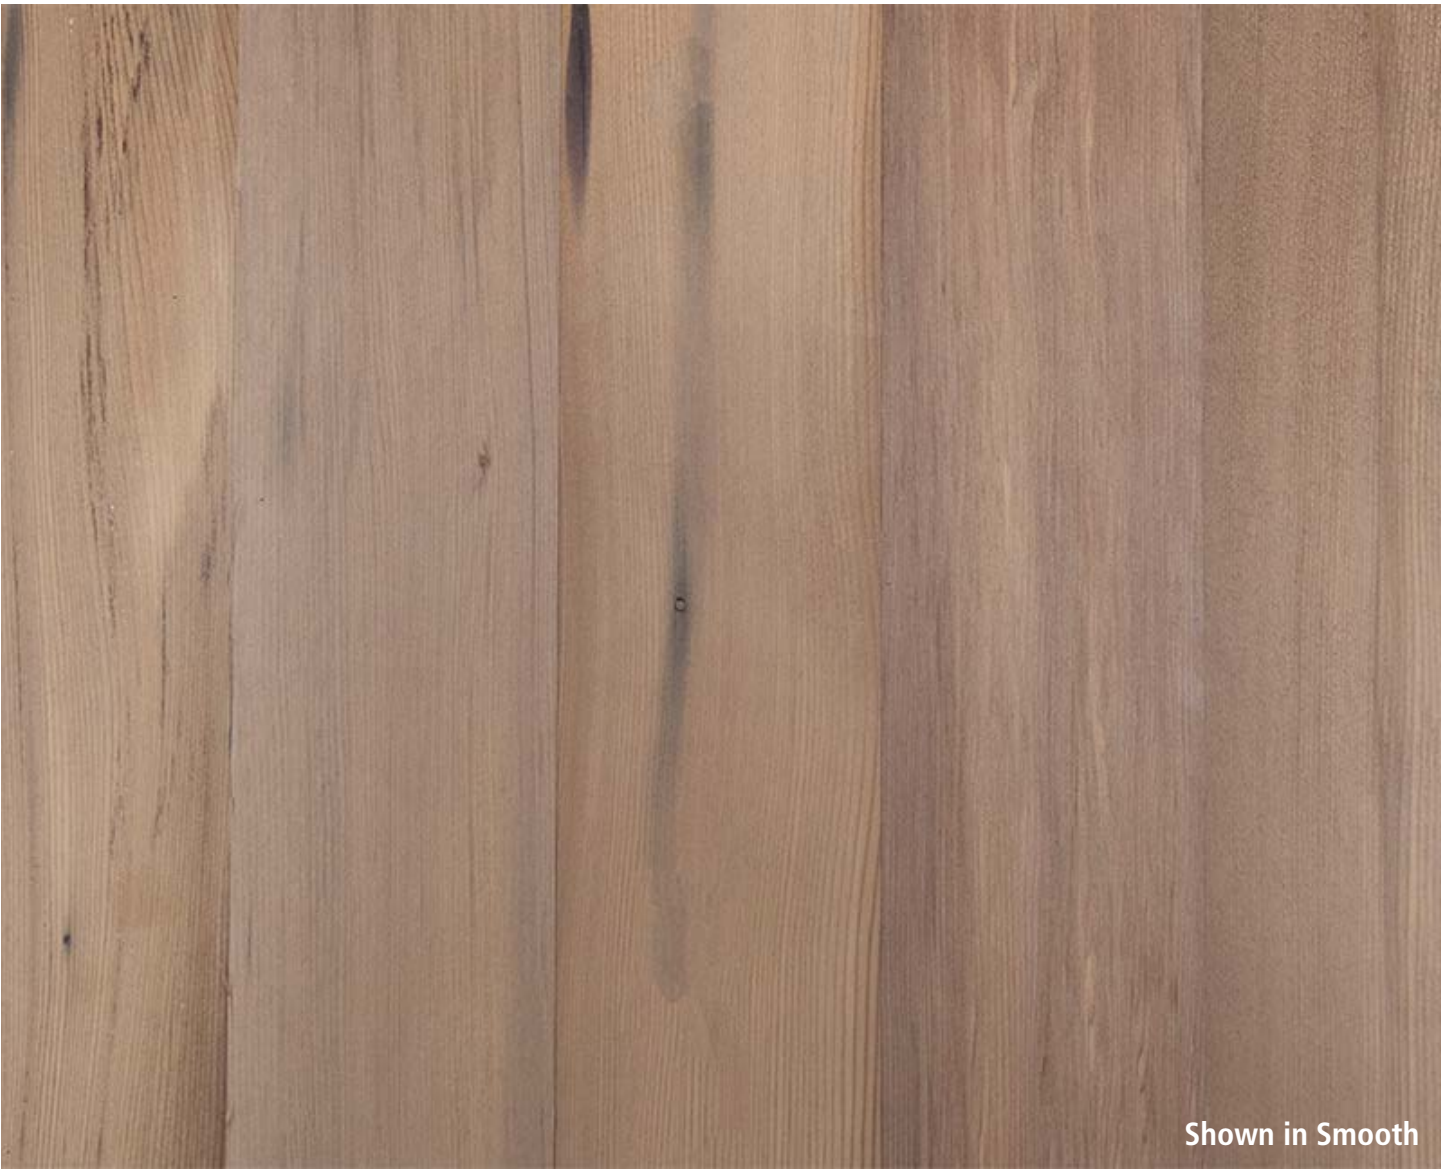

Salvaged from wine vats, this material is available in our smooth planed Center Cut grade which exposes the tight clear grain and pink to reddish-brown color tones of the wood. Typically, 10–20% of these planks will include some dark staining. This old growth redwood is a rare find and becoming rarer every day.

Source Location: New York

This fragrant and handsome material was sourced from recently decommissioned wine vats in the New York Finger Lakes Region. Our own crew of deconstruction experts carefully dismantled these massive 16' vats, often working gingerly between the newly installed stainless-steel replacement tanks. Check out our blog post to learn more about this project!
