INSTALLATION RECOMMENDATIONS

Overage: Minimum 10% additional material
for on-site grading, trimming and installation factors.

Climate: As with any wood paneling product, the room temperature should be held at a consistent range between **60-80° F** with relative humidity between **30-60%**.

Environmental conditions consistently outside of these parameters could result in product performance issues.

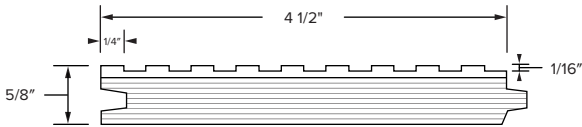

Raked™ Standard

Welcome to Raked, an exciting new milling technique we've developed which adds dimensional texture to our Modern Farmhouse product line. Available in standard, wide or random profiles, these high relief surfaces add a crisp, modern vibe and can be combined with paint and creative installation patterns for a vibrant look that can be endlessly customized. An engineered platform ensures stability and our precision tongue & groove millwork allows for quick and easy installation. Use it as an accent, or cover a whole wall to add some spice to your project!

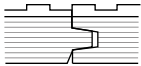

Where Light and Shadow Play

Cutting even reliefs across the surface of each plank leaves deep grooves where light and shadow play. The resulting striped pattern can be matched, rotated, or even sporadically sprinkled, throughout a project.
