Shou Sugi Ban Fir, Brushed

Traditionally Inspired, American Made™—an 18th century technique for preserving wood with fire is updated to meet 21st century design and performance standards. Aggressively burning the surface layer of our FSC® Certified Vertical Grain Douglas fir, we then wire-brush each plank multiplentimes to remove the soft char and expose the contrasting grain below. This heavily textured and visually dynamic surface is coated with an exterior grade finish in a selection of cool greys, warm browns, or a pop of color. Our Fir is a durable wood well-suited for exterior applications. Boards include vertical contrasting grains and texture—designed to be a hardy siding option that can withstand weather. Our Shou Sugi Ban Fir Brushed exposes the bright hypnotizing mixture of colors and texture created by the charring process. Our Shou Sugi Ban Fir Tiger's Eye is recommended for interior applications only due color instability resulting from the lack of pigment in the finish.
